Weekend Junior First-Aid Course

HARBOR FIRE STATION
Date: Saturday, August 22 (1:30 p.m. – 4:00 p.m.)
Location: Training Room, 2nd Floor
Cost: Free

Learn practical skills that can help your family and friends in an emergency! Firefighters will teach junior high school students how to treat minor burns, wrap a sprained ankle with a bandage, and use an AED machine safely.

Because participants will practice kneeling on floor mats, please wear comfortable trousers rather than skirts. Every student who completes the course will receive a pocket first-aid guide. Sign up online by August 16 (limit: 24 students).

(21) Why should participants wear comfortable trousers to the course?

1 Firefighters will spray water in the room.

2 The training room has no air conditioning.

3 They will practice kneeling on floor mats.

4 They will run five kilometers outside.

(22) What will every student get after completing the course?

1 Twenty-four bandages.

2 An AED machine for their home.

3 A pocket first-aid guide.

4 A firefighter's helmet.

From: Riku
To: Maya
Subject: Library counter duty next week

Hi Maya,
Could I ask you a favor about our student library committee schedule next week? I am scheduled for lunch-break counter duty on Tuesday, May 19, and you are scheduled for Thursday, May 21.

This morning, our science teacher announced that finalists in the city robot contest will have a special practice run in the gym during lunch break on Tuesday. Since my team made it to the finals, I really need to test our robot's sensor with my teammates that day. Would it be possible for us to trade days so that you take Tuesday and I take Thursday?

If we switch, we have to write the change on the schedule board inside the library office before Friday afternoon so Ms. Kono knows who is coming. Please reply tonight if Thursday's switch works for you!

Thanks a lot,
Riku

Switching Our Library Duty Day　設問 (23)〜(25)

(23) Why cannot Riku do library counter duty during lunch break next Tuesday?

1 He needs to test his team's robot in the gym during lunch break.

2 His family is taking a trip on Tuesday.

3 He has to visit a hospital outside the city.

4 Ms. Kono asked him to clean the science room.

(24) What is Riku asking Maya to do?

1 Join his robot contest team on Tuesday.

2 Trade duty days so Maya takes Tuesday and Riku takes Thursday.

3 Ask the science teacher to move the practice run.

4 Do both Tuesday's and Thursday's duties alone.

(25) If Maya agrees to switch days, what must they do before Friday afternoon?

1 Write the change on the schedule board in the library office.

2 Buy new bar-code scanners for the counter.

3 Return twenty-one books to the gym.

4 Send a letter to the city hall.

Maps You Can Touch

Last autumn, eighth-grade students at Hillside Junior High School visited the City Science Museum with a blind guest speaker, Mr. Nagai, who had talked to their class the week before about how he traveled safely around town. At the museum entrance, the students noticed something surprising: although there were colorful floor maps everywhere, none of them had raised lines or Braille labels that Mr. Nagai could read with his fingertips.

Back at school, four students in the craft club asked Mr. Nagai what kind of map truly helped him inside unfamiliar buildings. He explained that too many tiny details actually made a touch map confusing. What mattered most was clear textures, such as rough sandpaper strips for stairs, smooth raised tape for main hallways, and round wooden beads for restrooms and the information desk.

Over the next two months, the four students measured the first floor of their own school building, where guests often visited for concerts and parent meetings. They built a sturdy touch map on a wide wooden board using five distinct materials that felt completely different under a finger. Mr. Nagai tested their first version and suggested widening the space between hallway lines so two fingers could follow a route comfortably.

After the students improved the board and placed it inside the main entrance in January, not only visually impaired visitors but also young children and elderly grandparents stopped to trace the routes. Seeing how clear design helped everyone, the City Science Museum invited the students to share what they had learned with its exhibition staff.

(26) What surprised the students at the entrance of the City Science Museum?

1 Mr. Nagai worked there as the museum director.

2 There were no maps of any kind inside the building.

3 The museum did not allow junior high school students inside.

4 None of the floor maps had raised lines or Braille labels.

(27) According to Mr. Nagai, what makes a touch map most helpful?

1 Using clearly different textures for stairs, hallways, and key places.

2 Making every line out of the exact same smooth plastic.

3 Putting as many tiny details as possible on one small card.

4 Using bright red and yellow paint for every room.

(28) What change did Mr. Nagai suggest when he tested the students' first map?

1 Moving the map to the school roof.

2 Replacing the wooden board with thin tissue paper.

3 Removing all restrooms from the board.

4 Making the space between hallway lines wider.

(29) Who used the touch map after it was placed in the school entrance in January?

1 Nobody, because concerts were canceled all winter.

2 Only staff from the City Science Museum.

3 Only the four members of the craft club.

4 Visually impaired visitors as well as young children and older grandparents.

(30) What did the City Science Museum invite the students to do at the end?

1 Share what they had learned about clear map design with museum staff.

2 Paint colorful murals on the museum ceiling.

3 Close the first floor of Hillside Junior High School.

4 Sell wooden beads at the museum gift shop.
