MANATOBI / ORIGINAL PRACTICE

英検準2級
リーディングトレーニング

第8回 問題冊子

リスニング・英作文を含まない部分練習 ／ 全29問

大問	問題番号	内容
1	1〜15	短文の語句空所補充
2	16〜20	会話文の空所補充
3	21〜22	長文の語句空所補充
4	23〜29	読解

使い方

・解答用紙に答えを記入してください。問題冊子には正答を載せていません。
・問題・解説はA4縦、解答用紙はA4横。白黒・片面・実際のサイズ（100%）で印刷します。
・解き終わるまでは、別冊の解答・解説を開かないでください。
・同じ問題をアプリの分野別練習でも解けます。

独自作成した英検準2級形式のリーディング第8回です。リスニング・英作文・面接は含みません。公式教材ではなく、CSE・合否換算はしません。筆記全体の公式時間をリーディングだけの時間に流用しません。外部難度校正は未実施です。

氏名：＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿

短文の語句空所補充
1〜4から最も適切な答えを一つ選び、解答用紙にマークしてください。

(1) Please ( ) your seat belt securely before the ferry leaves the pier.

1 frighten **2** flatten **3** fasten **4** freshen

(2) Our biology teacher has a wide ( ) of wild mushrooms and ferns.

1 knowledge **2** luggage **3** marriage **4** postage

(3) Because the soup tasted slightly bland, my father added a ( ) of salt.

1 pile **2** piece **3** pair **4** pinch

(4) The mountain trail was closed ( ) after rocks slid onto the path.

1 politely **2** temporarily **3** fluently **4** privately

(5) This wooden toy is suitable ( ) children aged three and above.

1 of **2** at **3** for **4** with

(6) ( ) of the twin sisters plays the cello in the youth orchestra.

1 Both **2** Many **3** All **4** Each

(7) Let's take shelter under the station roof until the shower passes ( ).

1 over **2** off **3** into **4** down

(8) The baker apologized for keeping customers ( ) outside in the cold.

1 wait **2** waiting **3** waited **4** to wait

(9) Not only the players ( ) also the coach cheered when the final whistle blew.

1 but **2** or **3** and **4** nor

(10) My uncle goes jogging every morning ( ) of the weather.

1 ahead **2** instead **3** regardless **4** capable

1　短文の語句空所補充（続き）

(11) The town museum is worth (　　) if you want to see traditional fishing boats.

1 visit　**2** visited　**3** to visit　**4** visiting

(12) Sales of electric fans rose (　　) when temperatures hit thirty-five degrees in June.

1 calmly　**2** sharply　**3** shyly　**4** loosely

(13) Please look (　　) your test paper one more time before handing it in.

1 after　**2** into　**3** over　**4** up to

(14) We couldn't tell the two kittens (　　) until we put different ribbons on them.

1 aside　**2** apart　**3** aloud　**4** alone

(15) Once you get (　　) to waking up at six, mornings feel much longer and calmer.

1 used　**2** using　**3** use　**4** useful

2

会話文の空所補充
1〜4から最も適切な答えを一つ選び、解答用紙にマークしてください。

(16) A: Excuse me. Can I pay for these stamps with a credit card?
B: (　　) However, you can buy commemorative stamp books by card at Window 3.
A: Got it—I have coins right here.

1 Credit cards are made of paper.
2 Postcards don't need stamps.
3 The post office closed on Friday.
4 Regular stamps are cash only at this counter.

(17) A: You've been smiling at your phone! Did something good happen?
B: (　　) She sent a video of the puppy taking its first walk!
A: Aw, show me!

1 My phone screen cracked.
2 I lost my charger on the bus.
3 My aunt adopted a rescue dog last week.
4 Dogs bark at strangers.

(18) A: Should we take the coastal road or the mountain tunnel to the campsite?
B: (　　) Besides, we can stop at the fish market on the way.
A: Let's take the coast, then!

1 The coastal road has nicer scenery.
2 We aren't going camping.
3 Tunnels are underwater.
4 Neither road goes anywhere.

(19) A: Did Mr. Ono say how long tomorrow's chemistry quiz will take?
B: (　　) Then we'll spend the rest of the period on the lab experiment.
A: Good, so it won't be too long.

1 About two hours.
2 On page forty-two.
3 Chemistry was canceled all year.
4 Only the first fifteen minutes of class.

(20) A: I'd like to return this desk lamp—it doesn't turn on even with a new bulb.
B: (　　) Would you prefer a replacement or a refund?
A: A replacement of the same model, please.

1 Lamps don't use bulbs.
2 I'm terribly sorry for the trouble.
3 We only sell shoes here.
4 Please turn off the sun.

Why Stadium Grass Needs Artificial Sunlight

Modern soccer stadiums are built with steep, covered stands that shelter tens of thousands of fans from rain and wind, while keeping cheers echoing loudly around the pitch. For the groundskeepers tending the natural grass field, however, those towering roofs create a stubborn problem: even at noon on a sunny day, large sections of turf remain in deep shadow.

Grass blades need sunlight for photosynthesis, especially in winter when matches tear up wet soil and natural daylight hours are short. Without enough light, shaded goal areas quickly turn muddy and bare. To keep the turf thick and safe for players' ankles, many stadiums wheel out wide aluminum rigs fitted with high-efficiency grow lamps between matches. Sensors in the soil measure temperature and moisture so lamps warm and illuminate only the weakest patches. This targeted care (21).

Although running grow rigs uses electricity, keeping natural turf healthy avoids costly mid-season resodding, where entire truckloads of grass must be stripped and replaced. Healthy roots hold the ground together, proving that great stadium architecture must consider (22) as carefully as spectator comfort.

(21)

1 keeps all players from running near the goalposts

2 turns natural grass into hard gray concrete overnight

3 helps grass recover evenly even in the darkest corners of the field

4 removes the stadium roof every Tuesday morning

(22)

1 ticket prices for movie theaters

2 painting plastic seats in seven colors

3 how to freeze the field for ice hockey

4 the biological needs of the living playing surface

Guidelines for the High School Baking Contest

From: Prefectural Milk & Grain Council
To: Finalist Teams
Subject: Ingredient rules and oven slots for next Sunday's finals

Congratulations again on advancing to the six-team final of the High School Local Ingredient Baking Contest! Next Sunday's bake-off will take place in the Culinary Training Hall from 10:00 a.m. to 1:00 p.m.

Each team will have ninety minutes to bake twelve identical rolls or pastries featuring at least one fruit or vegetable grown in our prefecture. All dry ingredients must be weighed in the hall after the start signal; bringing pre-mixed dough from home is against the rules. However, fruit compotes or roasted sweet-potato fillings that require long simmering may be prepared the day before and brought in a sealed cooler box.

Because six teams share four large convection ovens, oven slots are staggered every ten minutes. Your team's assigned baking window is printed on the badge you will receive at 9:30 a.m. check-in.

Good luck to all bakers!
Contest Secretariat

Guidelines for the High School Baking Contest — Questions

(23) What is each finalist team required to include in their recipe?

1 At least one fruit or vegetable grown in the prefecture.

2 Imported chocolate from three countries.

3 Pre-mixed dough kneaded at home.

4 Twenty different kinds of cheese.

(24) Which preparation ARE teams allowed to do the day before?

1 Baking all twelve pastries at home.

2 Making fruit compotes or roasted sweet-potato fillings that take long simmering.

3 Weighing flour and sugar into bowls.

4 Decorating the plates in the Culinary Training Hall.

(25) Why are oven baking times staggered every ten minutes?

1 Six teams have to share four large ovens.

2 Only one judge can eat warm bread at a time.

3 The hall's electricity shuts off every ten minutes.

4 Teams arrive at the building ten minutes apart.

How Quiet Floors Help Hospital Patients Recover

When patients stay overnight in a hospital, uninterrupted sleep is one of the strongest aids to healing. Ironically, hospital wards have long been among the hardest places to sleep soundly. Alongside necessary medical monitors, everyday corridor sounds—squeaking supply carts, echoing footsteps on hard vinyl tiles, and clicking door latches—repeatedly wake light sleepers.

Acoustic researchers measuring ward noise found that sudden peaks in sound disturb sleep far more than a low, steady hum. A metal cart rolling over a tiny seam in a hard floor can send a sharp sixty-five-decibel clatter into nearby rooms, raising a sleeping patient's heart rate even if the person does not fully remember waking up.

To tackle this problem without sacrificing hygiene, hospital designers have rethought flooring and hardware from the ground up. New rubber-composite floors cushion footsteps and cart wheels while remaining seamless and easy to disinfect—unlike carpets, which trap dust and spills. Equally simple mechanical changes help: replacing metal trash-can lids with slow-closing dampers and fitting supply carts with soft polyurethane casters cut corridor noise spikes nearly in half during pilot studies.

Staff well-being improves alongside patient rest. Nurses walking ten kilometers per shift on cushioned rubber floors report less knee and back fatigue, and quieter hallways reduce misunderstandings when doctors discuss medication doses.

Thoughtful hospital design recognizes that recovery depends not only on advanced medicine, but also on a calm sensory environment.

How Quiet Floors Help Hospital Patients Recover — Questions

(26) According to acoustic researchers, what kind of sound disrupts patients' sleep the most?

1 A soft, steady fan hum.

2 Rain tapping gently outside a closed window.

3 Sudden sharp noise peaks such as a cart hitting a floor seam.

4 Quiet classical music in the lobby.

(27) Why don't hospitals simply lay ordinary carpet in ward corridors?

1 Carpets make footsteps three times louder.

2 Carpet fibers interfere with X-ray machines.

3 Nurses cannot push wheelchairs on any soft surface.

4 Carpets trap dust and spills, making strict disinfection difficult.

(28) What simple equipment changes helped cut corridor noise spikes nearly in half?

1 Banning nurses from walking in hallways after 6:00 p.m.

2 Slow-closing trash-can lids and soft polyurethane cart wheels.

3 Replacing all bedroom doors with heavy iron gates.

4 Giving every patient loud ear headphones.

(29) How do cushioned rubber floors and quieter hallways benefit medical staff?

1 Nurses walk zero kilometers per shift.

2 Doctors no longer need to write patient charts.

3 Staff experience less joint fatigue and communicate medication details more clearly.

4 Hospitals can turn off all corridor lights at noon.
