英検準2級
リーディングトレーニング

第10回 問題冊子

リスニング・英作文を含まない部分練習 ／ 全29問

大問	問題番号	内容
1	1〜15	短文の語句空所補充
2	16〜20	会話文の空所補充
3	21〜22	長文の語句空所補充
4	23〜29	読解

使い方

・解答用紙に答えを記入してください。問題冊子には正答を載せていません。
・問題・解説はA4縦、解答用紙はA4横。白黒・片面・実際のサイズ（100%）で印刷します。
・解き終わるまでは、別冊の解答・解説を開かないでください。
・同じ問題をアプリの分野別練習でも解けます。

独自作成した英検準2級形式のリーディング第10回です。リスニング・英作文・面接は含みません。公式教材ではなく、CSE・合否換算はしません。筆記全体の公式時間をリーディングだけの時間に流用しません。外部難度校正は未実施です。

短文の語句空所補充
1〜4から最も適切な答えを一つ選び、解答用紙にマークしてください。

(1) The city museum plans to ( ) the old wooden clock in its main lobby.

1 dismiss **2** display **3** disturb **4** divide

(2) Please check your receipt in ( ) there is a mistake in the total.

1 fact **2** turn **3** sight **4** case

(3) Regular stretching improves joint ( ) and reduces sports injuries.

1 flexibility **2** facility **3** familiarity **4** formality

(4) The soup was ( ) salty for the children, so Dad added some milk.

1 very much **2** much **3** far too **4** enough

(5) Our hiking club consists ( ) eighteen students and two teachers.

1 in **2** of **3** with **4** by

(6) There was ( ) traffic on the highway early Sunday morning.

1 almost no any **2** hardly many **3** hardly any **4** few

(7) We caught ( ) of a rainbow over the bay just after the shower.

1 scene **2** view **3** look **4** sight

(8) Neither the baker ( ) his apprentice noticed the timer ringing.

1 nor **2** or **3** and **4** but

(9) I had my watch battery ( ) at the station repair counter.

1 replacing **2** replace **3** replaces **4** replaced

(10) Ms. Takeda is in ( ) of ordering new science lab equipment.

1 change **2** charge **3** chance **4** choice

1　短文の語句空所補充（続き）

(11) Not knowing what to say, Kota simply nodded and smiled (　　).

1 politeness　**2** polite　**3** politely　**4** politer

(12) Please refrain (　　) using flash photography inside the butterfly house.

1 from　**2** to　**3** of　**4** with

(13) Our tent stood firm even after strong gusts blew (　　) the night.

1 into　**2** throughout　**3** between　**4** beside

(14) The ferry crew handed out warm blankets to passengers who were (　　).

1 shivering　**2** shining　**3** shrinking　**4** shouting

(15) It was only yesterday (　　) I learned about Mika's move to Sendai.

1 whose　**2** which　**3** what　**4** that

2

会話文の空所補充
1〜4から最も適切な答えを一つ選び、解答用紙にマークしてください。

(16) A: Excuse me. Is there a coin locker big enough for a cello case?
B: (　　) Instead, our baggage desk can hold it until seven p.m.
A: Oh, that's a lifesaver!

1 Cellos have four strings.
2 Yes, try any small yellow locker.
3 Our lockers only fit small bags.
4 Seven hundred yen, please.

(17) A: Why were there so many bicycles outside the community hall today?
B: (　　) Even my grandfather brought his old town bike.
A: Nice! I should get my brakes checked next month.

1 The hall was torn down last year.
2 Volunteers were holding a free repair clinic.
3 Nobody rides bicycles here.
4 It snowed fifty centimeters.

(18) A: Do you think two cartons of orange juice will be enough for fifteen guests?
B: (　　) Let's pick up two bottles of oolong tea as well.
A: Good call—not everyone wants sweet drinks.

1 Oranges grow in warm places.
2 That's way too much for two people.
3 The party was last Sunday.
4 We might run short.

(19) A: How is your ankle feeling after last week's sprain, Haruto?
B: (　　) The doctor said I can jog lightly starting Monday.
A: Glad to hear it—don't push too hard at first!

1 Much better, thanks!
2 I broke my glasses.
3 At the orthopedic clinic.
4 Every Wednesday afternoon.

(20) A: Could I switch cleanup shifts with you this Thursday, Nana?
B: (　　) You can take my Tuesday turn next week.
A: Deal! Thanks so much.

1 Cleaning starts at four.
2 Sorry, I'm out of town Thursday.
3 Sure, Thursday works for me.
4 We use two brooms.

Why Bakeries Slash Bread Dough Before Baking

Look closely at a crusty French baguette or country loaf, and you will notice diagonal cuts running neatly across the golden top. Home bakers often assume these slashes—known professionally as "scoring"—are merely a baker's artistic signature. While distinct patterns do help identify different loaves, a sharp blade actually solves a basic physics problem inside a hot oven.

The moment raw dough hits a hot baking stone, yeast activity surges and trapped water turns into steam, causing the loaf to puff up rapidly during the first ten minutes. Meanwhile, dry oven heat quickly hardens the outer skin into a firm crust. If no cuts have been made, expanding gas pushes against the weakest random spot on the side or bottom, tearing an uneven blowout and leaving the interior dense in one half and hollow in the other. Scoring creates deliberate expansion joints so the loaf (21).

Angle and depth matter too. Holding the blade nearly flat creates a thin flap of dough that peels back into a crisp, caramelized ridge prized for flavor. Thus, a two-second cut just before baking controls both (22).

(21)

1 stays completely flat like a thin cracker in the oven

2 rises evenly upward in a predictable shape without bursting at the sides

3 freezes solid before yeast can produce any bubbles

4 absorbs extra flour from neighboring shelves

(22)

1 how long customers wait in line on rainy mornings

2 a loaf's internal structure and its savory crust texture

3 the price of wheat and the size of the bakery window

4 the color of the baker's apron and wooden peel

Preparing for the Night Museum Tour

From: Education Desk, Prefectural Natural History Museum
To: Registered Families
Subject: Flashlight rules and check-in for Friday's "Fossils in the Dark" tour

Dear families,
We look forward to welcoming you to our special after-hours "Fossils in the Dark" tour this Friday! Exploring the dinosaur gallery with ceiling lights turned off lets everyone see dramatic shadows on tooth and claw textures that disappear under bright daytime lamps.

Check-in opens at the North Staff Entrance at 6:40 p.m. and closes promptly at 6:55 p.m., as the main glass doors lock automatically at seven. Please do NOT bring camping lanterns or ultra-bright bike headlights; our staff will lend every participant a narrow-beam red-filtered flashlight that protects night vision and prevents glare on glass cases.

Warm sweaters are recommended since air conditioning stays cool to protect specimens.

Museum Education Team

Preparing for the Night Museum Tour — Questions

(23) What is the educational benefit of viewing fossils with the ceiling lights turned off?

1 Visitors can climb onto the dinosaur skeletons in the dark.

2 The dinosaur bones glow green by themselves.

3 Museum electricity bills drop to zero for a month.

4 Side shadows reveal fine tooth and claw textures hidden under bright daytime lights.

(24) Why does check-in close strictly at 6:55 p.m. at the North Staff Entrance?

1 The museum's main doors lock automatically at seven o'clock.

2 The last bus leaves the museum at 6:56 p.m.

3 Staff members go home at seven.

4 The fossils are packed into crates at 7:00 p.m.

(25) Why shouldn't participants bring their own camping lanterns?

1 Only smartphone flashes are used on the tour.

2 Batteries are banned inside the city.

3 Lanterns attract bats from outside.

4 Staff lend special narrow-beam flashlights that protect night vision and reduce glass glare.

How Pocket Parks Cool Busy Neighborhoods

When city governments talk about expanding green space, residents often picture sprawling central parks with boating ponds and long jogging loops. Finding ten empty hectares inside an already crowded district, however, is nearly impossible. Instead, urban planners from Tokyo to Madrid are turning tiny leftover plots—a vacant corner lot, a former gas station, or two unused parking spaces—into "pocket parks."

Measuring smaller than a tennis court, a single pocket park may hold just four shade trees, a permeable brick path, a drinking fountain, and three wooden benches. Modest as that sounds, grouping dozens of small green oases a five-minute walk apart changes how a neighborhood feels in summer. Tree canopies block direct solar heat on asphalt, while soil beds soak up sudden downpours that would otherwise flood storm drains.

Social researchers have noticed equally important human effects. Large destination parks require a planned weekend trip for elderly residents or parents with toddlers, whereas a bench beneath zelkova trees fifty meters from a grocery store invites spontaneous ten-minute rests every day. Regular eye contact among neighbors watering flower beds also builds informal community trust.

Maintaining thirty scattered mini-parks can stretch municipal gardening crews thin if handled centrally. Successful cities solve this by pairing public tree pruning with neighborhood "park friends" volunteers who sweep leaves, plant seasonal bulbs, and report broken lights.

Grand city parks remain irreplaceable treasures, yet weaving tiny green pockets into everyday streets proves that nature does not have to be huge to transform urban life.

How Pocket Parks Cool Busy Neighborhoods — Questions

(26) What kind of land do cities typically use to create pocket parks?

1 Ten-hectare farms far outside the city.

2 Small leftover spaces such as vacant corners or former gas stations.

3 Active airport runways.

4 Rooftops of moving commuter trains.

(27) What two environmental benefits of pocket parks are mentioned in the second paragraph?

1 Growing timber for building bridges and feeding wild bears.

2 Generating wind power and melting winter snow.

3 Shading asphalt from summer sun and absorbing heavy rainwater into soil.

4 Blocking all city traffic noise completely.

(28) Why are pocket parks especially welcoming for elderly residents and parents with young children?

1 They sit right along everyday walking routes, allowing easy ten-minute rests without a long trip.

2 They charge high ticket fees that keep crowds away.

3 Every pocket park includes a roller coaster.

4 They are open only once a month on Sundays.

(29) How do successful cities manage the challenge of maintaining many scattered small parks?

1 They replace all real trees with plastic umbrellas.

2 They combine city tree maintenance with local volunteer groups who care for beds and tidy up.

3 They lock the gates so nobody can sit on the benches.

4 They hire one gardener per bench full-time.
