Preparing for the Bread-Factory Tour

From: Mr. Takahashi, Grade 8 Teacher
To: All Eighth-Grade Students
Subject: Dress rules and lunch plan for Thursday's factory study trip

Hello eighth graders,
This Thursday morning, our buses will visit Asahi Bread Factory to see how twenty thousand loaves are baked and packed every day! Because we will walk along the glass observation corridor beside real dough machines, strict hygiene rules apply.

Everyone will put on a paper hair cap provided at the factory entrance. Students with shoulder-length or longer hair should tie it neatly with a plain rubber band—no metal hair clips, please, as small clips must never enter food areas. Also, avoid strong-smelling hand cream that morning.

After the tour, we will eat our packed lunches at Keyaki Park nearby (or inside the buses if it rains).

Mr. Takahashi

Preparing for the Bread-Factory Tour — Questions

(23) Why shouldn't students wear metal hair clips to the bread factory?

1 Small clips must never accidentally enter food production areas.

2 Metal clips melt near the glass windows.

3 The bus seats scratch easily.

4 Paper hair caps cost extra for clips.

(24) What else are students asked to avoid on Thursday morning?

1 Bringing a packed lunch.

2 Using strong-smelling hand cream.

3 Wearing plain rubber bands.

4 Riding the school bus.

(25) Where will the eighth graders eat lunch if it rains?

1 Inside the buses.

2 Inside the dough-mixing room.

3 At the school gym before leaving.

4 At a restaurant inside Keyaki Station.

Bilingual Labels at the Town Museum

Fourteen-year-old Haruka loved visiting the small Folk Craft Museum in her castle town, which displayed wooden lanterns, indigo kimonos, and bamboo fishing baskets made a century ago. One Sunday in May, she saw two foreign tourists staring curiously at a woven bamboo fish trap. Because the display cards were written only in Japanese, the visitors left looking puzzled.

Haruka spoke with the museum director, Mr. Fujita, who admitted that his two-person staff was too busy to translate eighty display cards. The next day, Haruka proposed a summer volunteer project to her English club advisor, Ms. Carter.

Seven club members visited the museum with notebooks, asked Mr. Fujita how each tool had actually been used, and drafted short two-sentence explanations in simple English. Simply looking up dictionary words wasn't enough; Ms. Carter helped them explain cultural ideas—such as how river fish swam into the funnel shape but couldn't swim back out.

In September, QR codes and neat English cards stood beside thirty key exhibits, and Haruka felt thrilled watching overseas visitors nod with understanding.

Bilingual Labels at the Town Museum — Questions

(26) Why did the two foreign tourists leave the bamboo fish trap looking puzzled in May?

1 Photography was required at every exhibit.

2 The museum lights suddenly went out.

3 The explanation cards were written only in Japanese.

4 The bamboo basket was hidden inside a locked box.

(27) Why hadn't the museum made English display cards earlier?

1 All eighty exhibits were borrowed for just one week.

2 Foreign tourists were not allowed to enter the castle town.

3 Mr. Fujita disliked traditional bamboo crafts.

4 Its small staff of two was too busy to translate eighty cards.

(28) What did the seven English club members do before writing the English sentences?

1 They bought thirty new bamboo baskets online.

2 They interviewed Mr. Fujita about how each tool had actually been used.

3 They traveled abroad for two months.

4 They painted the indigo kimonos bright red.

(29) How did Ms. Carter help the students improve their explanations?

1 She told them to use only university-level technical words.

2 She translated all eighty cards by herself overnight.

3 She helped them describe how the tools worked in clear cultural terms, beyond word-for-word dictionary lookups.

4 She replaced the bamboo trap with a plastic fishing rod.

(30) What was set up beside thirty major exhibits in September?

1 Touch-screen video games.

2 Neat English cards and QR codes.

3 Vending machines selling green tea.

4 Live tanks full of river fish.
