MANATOBI / ORIGINAL PRACTICE

英検準2級
リーディングトレーニング

第5回 問題冊子

リスニング・英作文を含まない部分練習 ／ 全29問

大問	問題番号	内容
1	1〜15	短文の語句空所補充
2	16〜20	会話文の空所補充
3	21〜22	長文の語句空所補充
4	23〜29	読解

使い方

・解答用紙に答えを記入してください。問題冊子には正答を載せていません。
・問題・解説はA4縦、解答用紙はA4横。白黒・片面・実際のサイズ（100%）で印刷します。
・解き終わるまでは、別冊の解答・解説を開かないでください。
・同じ問題をアプリの分野別練習でも解けます。

独自作成した英検準2級形式のリーディング第5回です。リスニング・英作文・面接は含みません。公式教材ではなく、CSE・合否換算はしません。筆記全体の公式時間をリーディングだけの時間に流用しません。外部難度校正は未実施です。

氏名：＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿＿

1 短文の語句空所補充

1〜4から最も適切な答えを一つ選び、解答用紙にマークしてください。

(1) Please check that the tent pegs are ( ) driven into the ground before nightfall.

1 fondly **2** faintly **3** firmly **4** falsely

(2) The town hall will ( ) extra shuttle buses during the three-day pottery fair.

1 operate **2** occupy **3** offend **4** oppose

(3) My aunt has a remarkable ( ) for remembering people's faces after meeting them once.

会話文の空所補充
1〜4から最も適切な答えを一つ選び、解答用紙にマークしてください。

(16) A: Excuse me. This price tag says 1,200 yen, but the register just showed 1,500 yen.
B: (　　) Let me check the shelf sign and adjust the price for you.
A: Thank you for checking.

1 The store closes in ten minutes.
2 Cash is not accepted on Mondays.
3 You must buy two of them.
4 Oh, pardon me.

(17) A: Have you seen my navy-blue folding umbrella anywhere?
B: (　　) Did you check the umbrella stand outside the music room?
A: Oh! We had choir practice fourth period—it must be there!

1 Yes, I threw it away.
2 It's raining next month.
3 Not since this morning.
4 Blue is my favorite color.

(18) A: Would you like to share a large pizza, or order separate pasta dishes?
B: (　　) That way we can taste two different sauces.
A: Good idea! Let's pick one tomato pasta and one cream pasta.

1 Let's order two pastas and share them.
2 I already ate dinner at five.
3 Pizza was invented in Italy.
4 The waiter brought the bill.

(19) A: How is your grandfather's knee after last month's surgery?
B: (　　) Yesterday he walked all the way to the post office without a cane.
A: That's wonderful news!

1 It hurts too much to stand.
2 He hasn't seen a doctor yet.
3 The post office is closed.
4 Much better than we expected.

(20) A: Do you mind if I turn on the desk lamp? The clouds made the room quite dim.
B: (　　) In fact, I was squinting at my textbook too.
A: Great, there we go.

1 Yes, please turn it off.
2 Not at all.
3 Lamps use electricity.
4 I left my textbook at home.

Why Orchards Leave Strips of Wildflowers

Walk through a traditional fruit orchard, and you often see neatly mowed grass between every row of apple or pear trees. Tidy turf makes it easy to move ladders and harvest crates. In recent years, however, many fruit growers have stopped mowing the center of every lane, planting narrow strips of clover and native wildflowers instead.

The main reason is pollination and natural pest control. Fruit blossoms open for only a couple of weeks in spring. If an orchard offers no nectar for the rest of the year, wild bees and hoverflies move elsewhere. Wildflower strips bloom from April through October, keeping beneficial insects living right beside the trees. Ladybugs and lacewings sheltering in the flowers also feed on aphids, which helps farmers (21).

Growers still mow a clean path directly beneath the tree trunks so fallen fruit can be spotted and mice do not chew the bark in winter. Balancing neat working lanes with blooming strips shows that (22).

(21)

1 keep every bee out of the orchard in spring

2 cut down all their apple trees before autumn

3 reduce the amount of chemical spray they need

4 harvest pears without using any crates

(22)

1 wildflowers prevent apples from turning red

2 mice are the most helpful pollinators for pear trees

3 orchards must never be mowed in any season

4 small habitat changes can support both farming work and nature

Borrowing Snowshoes for the Winter Nature Walk

From: Kogen Nature Center
To: Registered Participants
Subject: Footwear and arrival time for Sunday's snowshoe walk

Dear participants,
We look forward to welcoming you to Sunday's guided snowshoe walk through Shirakaba Woods. Light snow fell yesterday, leaving forty centimeters of fresh powder along the trail—ideal conditions for beginners!

If you reserved rental snowshoes on your application form, please arrive at the nature center by 9:10 a.m., twenty minutes before the walk starts, so staff can adjust the straps to fit your boots. Note that we rent only snowshoes, not winter boots. You must wear waterproof hiking boots or tall snow boots that cover your ankles; low sneakers allow snow inside and slip out of the bindings.

Walking on snow warms the body faster than people expect. Instead of one thick down coat, wear two or three breathable layers that you can unzip or put in your backpack during uphill sections. Hot herb tea will be served in the log cabin after we return at noon; bring your own insulated mug if you have one.

Warm regards,
Kogen Nature Center Staff

Borrowing Snowshoes for the Winter Nature Walk — Questions

(23) Why should participants who reserved rental snowshoes arrive by 9:10 a.m.?

1 To have the snowshoe straps adjusted to their boots before departure.

2 To buy winter boots at the center's gift shop.

3 To shovel snow off the parking lot.

4 To drink hot herb tea before walking.

(24) What kind of footwear must participants wear on their own?

1 Canvas running sneakers.

2 Waterproof boots that cover the ankles.

3 Leather dress shoes.

4 Indoor gym shoes.

(25) What clothing advice does the nature center give?

1 Wear several layers that can be adjusted as you warm up.

2 Wear one heavy coat over a T-shirt.

3 Carry two extra pairs of jeans.

4 Leave your backpack in the log cabin.

Why Public Clocks Still Matter in the Smartphone Era

Almost everyone walking through a train station plaza or town square today carries an exact atomic-synced clock in a coat pocket. At first glance, spending municipal money to maintain large analog clocks on towers, schools, and park posts might seem outdated. Yet when cities remove broken public clocks instead of repairing them, residents surprisingly often petition to bring them back.

One reason is practical convenience in moments when hands are occupied. A parent holding a toddler's hand, a cyclist waiting at an intersection, or a commuter carrying grocery bags in winter gloves can check a clock face in half a second without unzipping a pocket. Even more importantly, pulling out a smartphone just to check the time frequently leads to unintended distraction—one glance at a notification banner, and five minutes vanish.

Urban designers point to a subtler social role as well. Unlike a private screen, a public clock creates a shared reference point in physical space. Saying "Let's meet under the station clock at two" gives friends and visitors an unmistakable landmark visible from across a crowded square. During major power or cellular outages following storms, wind-up or battery-backed tower clocks have also continued marking time calmly when digital displays went dark.

Maintaining outdoor clocks does require skilled hands. Gears exposed to freezing rain, sea breeze, and nesting birds must be cleaned and lubricated regularly, and fewer young technicians train in turret clockwork today. To keep costs manageable, some towns pair modern solar-charged movements behind historic dial faces, preserving the familiar look while simplifying upkeep.

Far from being mere nostalgia, a well-placed town clock quietly supports punctual, unhurried movement through shared streets.

Why Public Clocks Still Matter in the Smartphone Era — Questions

(26) What practical advantage do public clocks offer over smartphones in daily situations?

1 They send text messages when a train is delayed.

2 They run fifteen minutes ahead so nobody is late.

3 People with full hands or gloves can check the time in an instant without distraction.

4 They warm up cold station plazas in winter.

(27) How do public clocks serve a social or emergency function according to the third paragraph?

1 They count how many cyclists cross an intersection.

2 They broadcast loud music every fifteen minutes.

3 They charge commuters' phones wirelessly from across the square.

4 They act as clear meeting landmarks and can keep working during cellular or power outages.

(28) What challenge do towns face in keeping outdoor clocks working?

1 Birds steal the metal hands every spring.

2 Weather wears on the mechanisms and fewer young technicians specialize in turret clocks.

3 Solar panels cannot work anywhere in cities.

4 Laws prohibit repairing clocks older than fifty years.

(29) How have some towns kept maintenance costs reasonable while keeping historic appearances?

1 By painting a fixed time onto wooden boards.

2 By moving all outdoor clocks into museum basements.

3 By placing modern solar-charged movements behind traditional clock faces.

4 By asking commuters to wind the gears every morning.
